OUR READERS' CHOICE

I am delighted to present to you JD Supra's 2017 *Readers' Choice* awards, recognizing firms and authors who achieved top visibility and engagement on our platform over the past year.

Once again, we studied total visibility both among readers within specific industries *and* among readers across many industries interested in certain defining topics of the day. This year we also recognized authors within nine topics identified as emerging or growing in significant interest in 2016.

JD Supra editors chose the 25 industries and topics covered in these awards for their timeliness as well as their proven, ongoing importance. In each category, we recognized one firm and ten authors for their consistently highest readership and engagement for all of 2016. In total, we recognized the excellence and achievement of 24 firms and over 200 authors (selected from over 40,000) who published their substantive work on JD Supra during the year.

This booklet celebrates the firms and authors recognized by these awards, but the supplemental information accompanying each category (top readers, top related topics, top articles) also provides fascinating insights into the most pressing concerns and interests of professionals in the industries served by so many of our contributing clients. I recommend taking the time to peruse each section herein.

For my part, I'm proud to host a platform that helps to bring targeted visibility to such smart folks who deserve every bit of recognition for their excellence. And so, to our 2017 top authors and firms, I say a heartfelt congratulations. We're honored to be publishing your work.

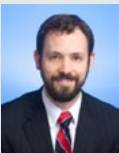

Yours in excellent thought leadership,

Aviva Cuyler
CEO, JD Supra
